

WEAR SOMETHING SAFER™

RICOCHET FACE MASK with BioSmart™ Technology

Ricochet's mask is made with Milliken™ BioSmart™ Technology. Milliken's BioSmart technology makes it simple and practical to integrate anti-microbial protection into the most common medical garments and products. Advanced molecular engineering binds chlorine to fibers to turn otherwise passive textiles into one more layer of active defense against inadvertent microbial exposure, contamination and infection.

- 9" Tall x 4.5" Wide
- Four 16" Tie Straps
- Pleated Front

Ricochet will donate \$1.00 from the sale of each mask to the National Fallen Firefighters Foundation.

HOW BIOSMART WORKS

- When fabric made with BioSmart technology is washed with an EPA-registered chlorine bleach, the BioSmart technology binds chlorine to the fabric's surface.
- When the fabric comes into contact with microbes, the chlorine is released to kill viruses and bacteria.
- The patented, bleach-activated technology harnesses the proven power of readily-available chlorine bleach to kill 99.9%* of bacteria and viruses.

- After each use, the technology is "recharged" simply by laundering the fabric with an EPA - registered chlorine bleach.
- BioSmart technology is proven to be durable through a minimum of 75 industrial or home washes.

** These masks are not a replacement for N95 face masks.*
